Core Capabilities
- **Software Development**
- **Data Analysis**
- **Assessment and Evaluation**
- **Interactive Media Development**
- **Creating applications in multiple languages**

The Julia Group has twenty-five years of experience creating customized software for evaluation, training, and dissemination. We cover all aspects, from online data entry through analysis and reporting.

Major Services Offered
Software Development
- Web-based, iOS or Android apps for online or off-line use
- User Experience Design
- Content creation: scripts, narration, animation, and images
- Programming in C, C++ , C# , JavaScript, HTML/CSS , PHP/SQL, SAS and SPSS

Data Analysis
- Data cleaning, missing data analysis
- Statistical analysis, model development
- Data visualization and reporting

Assessment and Evaluation
Development and validation of tests and measurement data entry forms, database, statistical analysis, and reports. Our services can also be purchased individually for clients who only need assistance with some assessment components.

Interactive Media Development
- Development of apps and websites for promoting public awareness
- Front-end interface for data collection from users
- Back-end for data storage and reporting

Differentiators
- Doctoral level researchers with experience in evaluation, statistical analysis, and software development
- Specialists in analysis of 'difficult data'
- Expertise in evaluation and development for low-resource communities
- Bilingual – English/ Spanish
